BLACK JACK AND GREAT WESTERN

David Evans Sells Out of Both to Jesse Knight.

BIG STRIKE IN THE FORMER

COMSTOCK AT PARK CITY CUTS ORE BODY.

Two important mining deals were consummated in this city yesterday when Uncle Jesse Knight, the "wizard of Tintic," relieved David Evans of his holdings in the Black Jack and Great Western Gold & Copper companies. In the Black Jack, which was lmost exclusively owned by Messrs. Knight and Evans, the latter's 100,000 of the 300,000 shares was taken over by "Uncle Jesse" at a snug figure, the amount of which was not released for publication. Of the 300,000 shares in the Great Western Mr. Evans owned 168,-1000, while "Uncle Jesse" was the sec-ond heaviest stockholder. The acquire-ment of the Evans holdings makes him

practically "the whole thing" in that company, as well as in the Black Jack. The Black Jack property adjoins the Lower Mammoth on the east and in its equirement and development Messrs. Knight and Evans have expended approximately \$200,000. A double compartment shaft has been put down to a depth of 1,400 feet and the mine contains, all told, about two and one-half miles of workings. All of this work has been done during the last

Work at Great Western.

Work at Great Western.

The Great Western property is located at the head of Big Cottonwood canyon and adjoins the western limits of the Daly-Judge. It contains a dozen or more patented claims and between 2,000 and 3,000 feet of development work has been done upon it. A tunnel has been driven for more than 2,000 feet and at the present time its face is nearing the great deposits of low grade copper ore that have been disclosed in the old upper workings. This property is looked upon as one of the coming big copper mines of the state and Uncle Jesse Knight is congratulating himself upon being able to land it.

here to take his family away. He is interested in the \$400,000 hotel that is being built at Venice and is also presiare represented largely in stocks and

Another Strike in Black Jack.

During the last week ore bodies have been opened on the 1,300 and 1,400 foot levels of the Black Jack property, at Tintic, and adjoining the Lower Mammoth, which are likely to mean a great deal to Uncle Jesse Knight, who now practically owns the property. Following the agreement of David Evans to sell his holdings to Mr. Knight, the two of them visited the property. That was on Friday last. On Saturday the showing had become such that a full railroad car of rich ore was lifted to the surface during the day shift.

car of rich ore was lifted to the surface during the day shift.

"If anything was lacking to clinch the deal with Mr. Knight." said Mr. Evans during the day, "the question was settled right there. I can say that full breasts of ore are now exposed in two or three places and it is very rich. There is no use of speaking of the sample assays, but I think it is safe to say that the ore will bring \$100 a ton all right. There is lots of horn silver in the rock and it carries, besides, about 6 per cent coppoer, some lead and good per cent copper, some lead and good values in gold. It is too soon to say what the strikes are going to amount to, but it locks as though a mine was

AT SILVER KING CON.

Expected That Sinking Will be Resumed by Thursday.

sumed by Thursday.

At the Silver King Consolidated company's property, Park City, the powerful new holsting plant is working like a charm and the shaft workings of the mine are being rapidly drained of water. The pumps on the 500-level have already been uncovered and they are now at work. The tanks are kept going and Superintendent "Jack" Keetley, who is down from camp, states that by Thursday, all going well, he will ave the shaft drained to the 500 and sinking under way figain. By today the large station pump on the 700 level should be uncovered and then it will be taken apart and placed in first-class order for the work ahead. With George H. Wilkinson, the best pump man in the camp, in charge of that work, he expects that twenty-four hours will see the big machine ready to respond to arry work it may be called upon to do. Superintendent Keetley says that the big engine will do the work demanded of it with so little effort that he has no fears of ever being bothered with water in the mine again. The wettest section of the ground was found between the 600 and 700 levels, anyhow,

water in the mine again. The wettest section of the ground was found between the 600 and 700 levels, anyhow, and when that has been drained off again, he does not expect that the pumps will have much to do.

He has a solendid crew of men at the property and during the remainder of the year he expects to make a fine conving in the development of the showing in the development of the ground. The Silver King Consolidated should be heard from in a substantial manner during the next tweive

ORE IN THE COMSTOCK.

Strike of Importance is Made on the 450-Foot Level.

countered in the Comstock, at Park City, on the 450-fott level, but Superintendent James Hickey, who telephoned the information to Manager Morris Dusseldorf, stated that it would take a week or so for him to determine that it was what he had been calculating upon. Mr. Dusseldorf had not thought of mentioning the matter, but when he was confronted with the news which came from an outside source, he reluctantly admitted having received word. The belief at camp is that one of the main ore shoots of the mine has been encountered and, if this proves to be true, the Comstock is likely to be heard from in no uncertain manner in the near future. Manager Dusselfor Stated that while the strike was counted as being important in demonstrating certain conditions in the ladge. A body of fine ore has just been encountered in the Comstock, at Park City, on the 450-fott level, but Superintendent James Hickey, who telephoned the information to Manager Morris Dusseldorf, stated that it would take

dorf stated that while the strike was counted as being important in demonstrating certain conditions in the ledge, he felt that it was altogether premature to talk about it at this time, as it might not prove up in the manner expected.

MINING STOCK EXCHANGE.

Month Closes to Good Business and Promise of Continuance.

35,916 shares of stock, with a selling alue of 3155,156,59, changed hands on the ocal mining exchange. As compared with the previous month the volume of business done was nearly \$20,000 greater and udging from the way the market is cting. August will show still better. Duling yesterday's calls a total of 41,355 hares sold for \$8,229,10, a good starter of a lively week. ares sold for \$8,220.10, a good starter a lively week.

Untic stocks have been commanding a greater amount of attention for a both and the trospects seem to be that on the mand the trospects seem to be that demines of that district are going to peat past performances in turning the ce. Public interest has shown a steady vance during the month and, while the cre has been a little scare created by a creatic actions of Lower Mammoth daffer of the other stocks, it does took as though interest in stocks herally would be affected to any apeciable extent.

Ore and Bullion.

Ore and Bullion.

The succession of holidays and cessation of work at either the mines or the smelters for one cause or another during the month, made the settlements in the local open market appear small by comparison with June. There may also have been something in the report that accurate data was no longer being supplied. At any rate, the falling off was nearly \$576,000. As reported through McCornick & Co., the settlements for the month were \$1.514,400, as against \$2.00.300 for June. The settlements for yesterday were reported at \$60,900, as follows: Silver, lead, gold and copper ores, \$21,200; base bullion, \$29,700.

Silver, 591/c per ounce. Copper (casting), 14%c per pound. Lead, in orc, \$3.50; New York, \$4.56.6.

NEVADA'S GOLDEN TRIANGLE.

100@28%c; 200@25%c; 1,900@ J .M. Kennelly Has Good Words For Adam

Crescent and Searchlight.

J. M. Kennelly, the old time prospector and mountaineer, has a great knowledge of the Nevada country. His long time experience in the mountains southwest makes him somewhat of a sir oracle on mining matters and mining districts. Lately he has been on a trip through the Searchlight and Crescent mineral belt. He speaks with great confidence as to the future of these districts. They have, in his opinion, resources and deposits of mineral that will make the golden triangle of Nevada the greatest producer of the precious metals in the state, says the Las Vegas Times.

All the claims visited by him have good showings in the way of minerallization, some better than others. A group of claims or prospects that he designates as too notchers are the Black Metal, Jones, J. Ross Clark, E. W. Gillett and T. M. Grace. These claims show particularly well and carry good values in gold and sliver. The ledges are large and are from eight to twenty feet in width.

According to Mr. Kennelly the owners Crescent and Searchlight. and are from wight.

According to Mr. Kennelly the owners are arranging to put up a hoist this fall and will proceed to do development work that will mean another dividend payer. The property is located northeast from Crescent springs about one and one-half miles.

BUY INTO SPRING VALLEY.

BROKERS-TAKE THEIR PROFITS

Action of Market During Process Was

THEN CAME THE DULLNESS

BULL SPECULATORS DISCOUR-AGED OVER THE DAY.

New York, July 31.—Today's stock market had to face the ordeal of profittaking on last week's advance which is an almost inevitable process on a Monday after a preceding rise in prices. The action of the market while the process of digestion das going on was encouraging, a considerable absorption being effected without serious impairment of prices. Orders from commission houses were considered to disclose N. Y. O. & W. 18 being effected without serious impairment of prices. Orders from commission houses were considered to disclose an appreciable awakening of interest from new sources outside the habitual speculative contingent. This was what was hoped for as a consequence of the attractive rise in prices which occured at the end of last week. But after the period of profit-taking of the morning had passed the trading became duil and in this the speculations appeared languid. This was a disappointment to the speculators who looked for hisk renewal of operations for the adding the proferred with the speculators who looked for hisk renewal of operations for the adding the professed steel 2,300. Preferred 400. peared languid. This was a disappointment to the speculators who looked for brisk renewal of operations for the advance following the demonstration of the market's absorptive powers. There was nothing in the day's news to affect the market immediately, either way, and working on nominal lines of previous steps in the speculation was relied upon to move prices. Stocks that did not move widely were in the less important department, industrial specialties making the largest showing. Industrials having to do with the metal trades either as producers or consumers of iron, steel, copper, lead, etc., moved in fair accord, the United States steel stocks being the noted exceptions. steel stocks being the noted exceptions. The railroad equipment stocks and the electrical companies were included. Published reports of a condition in Preferred
U. S. Steel
Preferred
Virginia-Carolina
Chemical
Preferred
Vabash
Preferred these trades and an advance in the market price of copper were held to account for this movement. The fact that the advances did not prevent the prices of railroad stocks from sagging prices of railroad stocks from sagging was attributed partly to the profit-taking in process in those stocks. There was also some depression caused by the revival of black rust damage reports from the spring wheat belt by authorities deemed conservative. The development of dangerous conditions to either spring wheat or corn undoubtedly would greatly change the present basis of stock market reckning and the present basis of stock market present basis of stock present basis of stock market present basis of stock present basi

erty now begins to show a change that indicates a near approach to the dyke. The ground has been very hard and progress was correspondingly slow. Coming down the canyon on the way back overcoats were worn with comfort. Salt Lakers Tackle a Property in Humboldt County, Nev.

During the past week Utah capital has signified its faith further in Nevada by taking hold of the J. J. McCarty property in the Spring Valley district, says the Lovelock (Nev.) Tribune. A good deal of prospecting has been done on these properties at different times by Mr. McCarty and good values have been developed. Through the efforts of Messrs. J. E. and C. D. Ray prominent capitalists of Utah have become interested in these claims.

During the past week the attorney general of that state examined the mines and the report to his associates was so satisfactory that a company has been formed and the development work will soon begin. The new company will seem to make rapid headway in the building of the line from now on.

James A. Pollock, president of the Salt Lake mining exchange, returned Sunday inglift from a month's trip to St. Louis and Chicago. He expresses great satisfaction at having escaped the hot spell here, as nearly all the time during his absence the weather where he has happened to be was delightful.

Manager C. D. Rooklidge of the New Company will be seed to such the company is advised that

GRAIN AND PROVISIONS.

one out of sixty provinces outside of southern districts being total failures, according to a London newspaper. Soon after the opening here the market gained additional strength on a weather bureau prediction of frost tonight in southern Minnesota. During the first hour commission houses and pit traders were active bidders for wheat, but offerings were rather light. As a result September advanced to 85%. Toward the noon hour the market reacted somewhat on selling brought out by liberal primary receipts. An increase of 1,479,000 bushels in the visible supply was an additional bearish influence. A decline of about 2c in the price of the July option had a depressing effect on distant months. Prior to the close shorts became active buyers and caused renewed strength. The market closed strong. %c up lat 85%.
